

Study program: Modern Business Management; Module: Informatics and Business management			
Subject name: Project Management			
Lecturer: Dejan Gligović, Ph.D. (dejan.gligovic@mbs.edu.rs)			
Subject status: obligatory			
ECTS: 7			
Pre-requisites: -			
Subject objectives The main goal is to introduce students to the basics of project management as the resource by which the organizations accomplish the goals set. Namely, the organization possesses powerful resources to improve qualities planning, the implementation and control of their own activities as well as the ways of using the overall company resources. While modern product development technology is easily copied, project management enables its carrying out in complete anonymity. The increase of project management importance is especially visible within multi project management, the simultaneous management of a bigger number of companies.			
Subject outcomes Students should be able to research immediately the nature of project management, to realize how to use the knowledge to complete the project, to be introduced to the tools and techniques used by the managers in project activities, to research the process of projects generations, to realize the direction of the company project management, to see the difference in different types of organizations for project management, to research the role of management in research projects.			
Subject description Assignments: Theoretical: Project—definition, frame, and its hypotheses, project generation processes, strategic context of project management, the development of project management concept, processes and models for projects selection, risk and project risks management, projects planning, the organization for project management, budget project creation and costs estimation, quality project management, the project implementation, project control, the project revision and the ending of project. <i>Practical:</i> Case studies, discussions, simulations in groups.
